Specialised Osteotomy Surgery for Lasting Relief

Realignment Osteotomy

www.vishalpai.com.au

Knee arthritis affecting one side and causing pain? Realignment **osteotomy surgery**, expertly performed by Dr Vishal Pai, can realign your knee joint, relieving pressure and potentially allowing you to return to an active life. This innovative procedure involves a precise bone cut to shift weight away from the damaged area, offering long-lasting pain relief and delaying the need for joint replacement.

Dr Pai personalises each case to ensure optimal results for knee surgery in Melbourne. **Contact us** today at our Website to learn more and schedule your consultation!
