

# HOW TO CLEAN A DRYER VENT IN 5 SIMPLE STEPS

Keeping clean dryer vents is important for efficient drying and fire prevention. Follow these five simple steps for a thorough cleaning:

## Step 1

Open the dryer and disconnect the rear vent.

## Step 2

Use a vacuum with a long, flexible extension to remove lint buildup inside the vent.

## Step 3

Clean the vent opening and duct with a vent brush to clear persistent debris.

## Step 4

Reconnect the vent and plug the dryer in.

## Step 5

Finally, hire professional dryer vent cleaning in Sacramento annually for a deep clean and inspection to ensure safety and optimal performance.

By following these steps and investing in **professional dryer vent cleaning in Sacramento**, you'll protect your home and appliances for years to come.
